There’s so much to do before the big day. Let us help guide you on ways to keep your newborn healthy from the start.

Visit VaccinateYourFamily.org to learn…

- How getting flu and whooping cough (Tdap) vaccinations while pregnant protect you and your newborn baby.
- Why it’s important to follow the CDC’s recommended schedule.
- Which vaccines your baby needs and when each is due.
- Why your baby needs the Hepatitis B vaccine before leaving the hospital.
- How vaccines in the U.S. are continually monitored for safety.
- What to do if you can’t afford to pay for vaccines.
- Where to find credible resources on vaccines.
- And much, much more…
